

# Professional Scrum Master Advanced (PSM-A)

2 Days

## Overview

The 2-day Professional Scrum Master Advanced (PSM-A) course is an advanced class designed to support Scrum Masters in their professional development.

Unlike the Professional Scrum Master (PSM) course which focuses on how to use Scrum, the Scrum framework and the role of the Scrum Master, PSM-A is an advanced course which helps students to understand the stances that characterize an effective Scrum Master and servant-leader. The class dives deep into how Scrum Masters serve the Scrum Team, Product Owner, and the organization. Students will learn about areas critical to growing as a successful Scrum Master such as how the principles and values of Scrum help guide Scrum Masters in the decisions they make and how the Scrum Master can help change the environment of Scrum Teams, creating the conditions for agility to thrive. Students will also explore related practices and skills which will enable them to have the right types of conversations and how to apply them to become better Scrum Masters. Throughout the class, your PST will provide stories, exercises, facilitation techniques (such as "Liberating Structures"), resources, and more. This is a formal Scrum.org certification course.

## Who Should Attend

The Professional Scrum Master II course is an advanced course specifically designed for experienced Scrum Masters who have a thorough understanding of the Scrum framework. It is particularly beneficial for those with at least one year of Scrum Master experience.

## Prerequisites
